

Australian Standard<sup>®</sup>

---

**Information technology—  
Open Systems Interconnection—  
The Directory**

**Part 5: Protocol specifications**

---

This Australian Standard was prepared by Committee IT/1, Information Systems—Interconnection. It was approved on behalf of the Council of Standards Australia on 2 March 1992 and published on 16 April 1992.

---

The following interests are represented on Committee IT/1:

AUSSAT

Australian Association of Permanent Building Societies

Australian Bankers' Association

Australian Bureau of Statistics

Australian Committee of Directors and Principals

Australian Computer Society

Australian Computer Users Association

Australian Information Industry Association

Australian Telecommunications Users Group

Australian Vice Chancellors Committee

Confederation of Australian Industry

CSIRO—Institute of Information and Communication Technologies

Department of Defence

Department of Industry, Technology and Commerce

Information Exchange Steering Committee

Life Insurance Federation of Australia

OTC

Standards Association of New Zealand

Telecom Australia

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This Standard was prepared by the Standards Australia Committee on Information Systems—Interconnection. It is identical with and has been reproduced from ISO/IEC 9594-5:1990, *Information technology—Open Systems Interconnection—The Directory—Part 5: Protocol specifications*.

The Standard is one of a series of Open Systems Interconnection (OSI) Standards which are currently under development. Since OSI Standards are developmental, there may be some minor difficulties encountered in their implementation. For this reason, Standards Australia will be providing, through the OSI Help Desk, a service to coordinate and disseminate information concerning difficulties which are identified in using this Standard.

Under arrangements made between Standards Australia and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

- (a) Copyright is vested in Standards Australia.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Australian Standard, the ISO/IEC text should be modified as follows:

- (i) *Terminology* The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.
- (ii) *References* The references to International Standards should be replaced by references to Australian Standards as follows:

<i>Reference to International Standard or other Publication</i>	<i>Australian Standard</i>
7498 Information Processing Systems—Open Systems Interconnection—Basic Reference Model	2777 Information processing systems—Open Systems Interconnection—Basic reference model

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

# Information technology—Open Systems Interconnection—The Directory

## Part 5: Protocol specifications

### 1 Scope

This part of ISO/IEC 9594 specifies the Directory Access Protocol and the Directory System Protocol, fulfilling the abstract services specified in ISO/IEC 9594-3 and ISO/IEC 9594-4.

### 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this part of ISO/IEC 9594. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this part of ISO/IEC 9594 are encouraged to investigate the possibility of applying the most recent editions of the standards listed below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 7498:1984,	<i>Information Processing Systems—Open Systems Interconnection—Basic Reference Model.</i>
ISO 8649:1988,	<i>Information Processing Systems—Open Systems Interconnection—Service Definition for the Association Control Service Element</i>
ISO 8650:1988,	<i>Information Processing Systems — Open Systems Interconnection — Protocol Specification for the Association Control Service Element.</i>
ISO 8822:1987,	<i>Information Processing Systems — Open Systems Interconnection — Connection Oriented Presentation Service Definition.</i>
ISO/IEC 8824:1990,	<i>Information Technology — Open Systems Interconnection — Specification of Abstract Syntax Notation One (ASN.1).</i>
ISO/IEC 8825:1990,	<i>Information Technology — Open Systems Interconnection—Specification of Basic Encoding rules for Abstract Syntax Notation One (ASN.1).</i>
ISO/IEC 9072-1:1989,	<i>Information Processing Systems — Text Communication — Remote</i>
