

Australian Standard[®]

Flat synthetic-webbing slings

Part 1: Product specification

This Australian Standard was prepared by Committee ME/25, Lifting Tackle. It was approved on behalf of the Council of Standards Australia on 8 August 1997 and published on 5 December 1997.

The following interests are represented on Committee ME/25:

Australian Chamber of Commerce and Industry
Australian Chamber of Manufactures
Australian Forging Group
Australian Maritime Safety Authority
Department of Defence
Institution of Engineers, Australia
Metal Trades Industry Association of Australia
National Association of Testing Authorities, Australia
Victorian WorkCover Authority
Work Health Authority, N.T.
WorkCover, N.S.W.
Workplace Standards Authority (Tasmania)

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 96094.

Australian Standard[®]

Flat synthetic-webbing slings

Part 1: Product specification

Originated as part of AS 1353—1974.
Previous edition AS 1353.1—1990.
Second edition 1997.

Incorporating:
Amdt 1—1998

PREFACE

This Standard was prepared by the Standards Australia Committee ME/25, Lifting Tackle, to supersede AS 1353.1—1990.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

This edition includes the following changes:

- (a) References to and the definitions of ‘statutory authority’ and ‘soft eye’ have been deleted.
- (b) Clause 5.4.1 no longer recommends widths for webbing.
- (c) Clauses 5.2, 5.3 and 5.10 have been added.
- (d) The colours of a sling to identify its WLL (as specified by Clause 7.1) for 4 t and not less than 10 t have been reversed, to align with the latest overseas practice.
- (e) In Appendix B, the requirements for the rate of application of a test force have been deleted.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

Australian Standard

Flat synthetic-webbing slings

Part 1: Product specification

1 SCOPE This Standard specifies requirements for flat synthetic-webbing slings that are intended for lifting purposes.

This Standard does not apply to slings that have been repaired.

NOTES:

- 1 Guidance on information that should be supplied with enquiries and orders is given in Appendix A.
- 2 Recommendations for the care and use of flat synthetic-webbing slings are given in AS 1353.2.

2 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

| HB18.28 | Guide 28—General rules for a model third-party certification scheme for products |

3 DEFINITIONS For the purpose of this Standard, the definitions below apply.

3.1 Competent person—a person having practical and theoretical knowledge and relevant experience, sufficient to enable that person to detect and evaluate any defects and any weaknesses that may affect the intended performance of the equipment.

3.2 Constructions of slings

3.2.1 Endless sling—a sling consisting of a webbing having its ends sewn to each other (see Figures 1(a) and 1(b)).
